Free online adventure role-playing game with anime inspired graphics.Q: How to use a dll with the "open" command? I have 2 or more dll files that I have to use in C++. I want to use the open command to open the dll files. However, I can't use the dll's "C/C++" project. Is there a way to solve this issue? I tried to run the.cpp files through visual studio (C++ project). However, I had many problems. My code does not understand the syntax. Do I have to change the language from C++ to anything else? A: You need to create a precompiled header file, which can be done easily in Visual
